

THE ALUMNI ASSOCIATION OF
FR. CONCEICAO RODRIGUES COLLEGE OF ENGINEERING

CRCE ROOTS

MAY 2023

PRINCIPAL'S MESSAGE

Dear Alumni,

Greetings from Fr. Conceicao Rodrigues College of Engineering. I am happy to write a foreword to this newsletter. I hope this message finds you in good health and high spirits. Thank you for your continued support to college.

The past few years have been challenging for us all, but despite the difficulties, we are proud to see how our alumni have risen to the occasion and made a positive impact in their communities.

As we move forward, we are committed to staying connected with our alumni and offering new opportunities for engagement. I am sure the alumni association has planned many more events and initiatives to engage you on a regular basis. During the Alumni meet I had a chance to connect with some of you. Then I had proposed few exciting events to engage alumni like Hackathon for alumni; organised, conducted by and for alumni on any topic of relevance to them. I had also given a call to alumni to come forward and help us in creating an ecosystem for incubation; you can also have your start-up at Fr. CRCE. Come and help us in developing 'Job Creators rather than job seekers'.

As a proud graduate of Fr. Conceicao Rodrigues College of Engineering, you know the impact that our college has had on your life and the lives of countless others. We would love to hear from you and stay updated on your recent accomplishments and adventures. If you have any updates to share, please reach out to us.

Our goal is to provide our students with the resources they need to succeed and make a difference in the world. You have a unique opportunity to give back to your alma mater and support the next generation of students. Your contribution will have a lasting impact on the lives of our students, helping us provide scholarships, invest in cutting-edge technology and equipment, and support innovative programs that inspire and challenge our students to reach their full potential. Your generosity will make a difference for generations to come. Your support will ensure that your alma matter remains a leader in education for generations to come. Every contribution, no matter how big or small, makes a difference. If you are able to support us, please contact office bearers of the alumni association to make a contribution today.

Your contribution will help us provide students with the resources they need to succeed and make a difference in the world. It will help us provide a better learning experience to the students.

We hope to hear from you soon and stay connected.

Best regards,

Dr. Surendra Singh Rathod

Principal, Fr. Conceicao Rodrigues College of Engineering

CHAIRPERSON'S MESSAGE

**Dr. Sapna Prabhu
Chairperson**

Dear Friends,

It gives me immense pleasure to present to you the third edition of the Annual Alumni Newsletter "CRCE-Roots". The Newsletter hopes to reach out to all of you, keeping you informed about the happenings at CRCE and also about Alumni-related activities throughout the year.

"We make a living by what we get, but we make a life by what we give."

As one goes through the passage of life, one gains in terms of material and intellectual growth. At such a point, there is a need felt to give back to society or the world at large in some way or the other. There is a lot that can be done by Alumni to help the present batches of students in terms of guidance, professional or otherwise. Because when we give, we don't only help the immediate recipient of our gift, we also spur a ripple effect of generosity through our community. We, the Alumni committee of Fr CRCE are committed to creating an ecosystem for both ex-students as well as present students for the mutual benefit of all concerned. We invite Alumni to extend their whole-based support to the Institute, students as well as other Alumni.

This Newsletter is a mix of activities reports, interviews by Alumni and much more. Hope you have an enjoyable read!!

**Dr. Sapna Prabhu
Chairperson, Alumni Association,
Fr. CRCE**

COUNCIL REPORT

The Alumni Association of Fr. Conceicao Rodrigues College of Engineering works hard to foster relationships between former students and present students. The committee has planned a number of occasions, including the Alumni Meet, Seminars, and the Spotlight Series. These activities support Fr.CRCE's present students, alumni, and college in general.

The goal of the Alumni-Student Mentoring Program is to link alumni and students.

A webinar was scheduled for July 17, 2022, to help students better prepare for their Quantiphi interview. Alumni from different organizations provided one-on-one mentorship to help students prepare for placements.

Students learned the value of participating in hackathons and other technical activities from a seminar given on July 27, 2022, by our alumni Mr. Vedant Sahai and Mr. Princeton Baretto. On July 29, Mr. Chinmay Kolhatkar held a seminar in which he informed us about the uses for industry 4.0. In the seminar that was held the next day, Dr. Sachin Pawaskar provided insights on exploring opportunities with the university of Obama.

On September 25, Mr. Ryan Dsilva and Mr. Abhishek Kateliya presented their experiences and gave advice to students interested in continuing their education.

The CRCE Alumni Spotlight sheds light on the accomplished careers of the iconic figures who attended our Institute. These videos have been posted to both our Instagram account and YouTube channel. Our intention is that these tales will inspire you to continue pursuing your goals. Graduates who have made outstanding contributions to their fields of interest have been highlighted.

The annual "Alumni Meet" took place at Samvaad on January 7, 2023 to rekindle the connection between alums and the institute they fondly remember as 'home'. This year's gathering drew more than 100 alumni from different parts of the world. The Silver Jubilee Celebration for the class of 1997 opened the event, which was then followed by the awarding of the Distinguished Alumni Awards. The evening was exciting and unforgettable due to a mix of nostalgia and enjoyment.

ALUMNI MEET REPORT

The annual 'ALUMNI MEET' conducted by the Alumni Association of Fr Conceicao Rodrigues College of Engineering was held on Saturday, 7th January, 2023, at Samvaad, the college auditorium. In attendance were alumni from a number of batches, honourable dignitaries, faculty and various technical and non-technical student teams and councils. More than 100 alumni from around the globe attended this year's event.

The event commenced with the Silver Jubilee Celebration of the 1997 batch, followed by the presentation of the Distinguished Alumni Awards. It was a combination of nostalgia and fun that made the evening eventful and memorable.

Objective:

The Alumni Association through the 'Alumni Meet' aimed to reunite alumni from different years with the college, develop a strong community of alumni and to keep the alumni informed about the current college developments. During this year's celebration, we felicitated the 'Batch of 1997' which completed 25 years of graduation in 2023. The event also served as a platform to honour distinguished alumni in various categories for their noteworthy achievements.

Event Synopsis:

A high tea session began the evening, during which alumni and faculty members interacted extensively. Subsequently, the Silver Jubilee Ceremony of the 1997 batch commenced with a walkthrough video of the college and the address from the dignitaries. Director, Rev. Fr. Valerian D'Souza in his address welcomed all the alumni and spoke about how the college is expanding to new areas and introducing new branches. This was followed by the address from the Principal Dr. Surendra Singh Rathod, in which he spoke about how the college is developing and briefed about the Alumni Feedback Form that mentioned different ways in which the alumni can stay connected to the institution and help it grow. Former principal Dr. Srija Unnikrishnan was then welcomed and, in her address, spoke about the changing times and that amidst so much information, the alumni are a valuable source that can guide students. Former principal Dr Sesha Iyer in his address rekindled old memories and reminded the alumni of their time in the college as students.

The Chairperson of Alumni Association of Fr. CRCE, Dr. Sapna Prabhu in her address expressed her gratitude for the overwhelming response from the alumni and presented a brief report of the college activities and the Alumni Association's work. The three branches, Production Engineering, Electronics Engineering and Computer Engineering of the 1997 batch were then felicitated. Mr. Rahul Eklahare spoke on behalf of the Production Engineering branch. Some notable alumni present from the branch were, Mr. Kalpit Jain – CEO at Netcore Cloud, Mr. Parag Naik – Associate Vice President at GP Strategies and Mr. Kaushalya Gaonkar – General Manager at Eaton Corp. Mr. Lokin Chemburkar, spoke on behalf of the Electronics Engineering branch. Some of the notable alumni present were, Mr. Rakesh Vengurlekar – Sr. Consultant at TCS, Mr. Parag Joshi – Sr. Technical Consultant at Workday Inc and Mr. Devang Goradia – Cofounder and CIO at Margo Networks Pvt Ltd. Mr. Lester Fernandes, spoke on behalf of the Computer Engineering branch. Some of the notable alumni present were, Mr. Virendra Swar - Engineering Leader/Executive at Salesforce, Mr. Yatin Kapadia – Vice President at Capgemini, Mr. Carlton Vaz - VP Cybersecurity Architect at BNY Mellon, Mr. Amit Gawali - Director of Engineering at Willis Towers Watson.

The next segment of the event included entertainment performances by the students. This was followed by, the distinguished alumni awards, which had five categories this year. These included CRCE Young Achiever, CRCE Corporate Leader, CRCE Entrepreneurial Leader, CRCE Social Impact Leader, and CRCE Top Entertainer.

The profiles of all the nominees were thoroughly scrutinized by a screening team to shortlist candidates. In the final round, the shortlisted candidates were selected by a panel consisting of senior professors and senior alumni from the industry. This year, the CRCE Young Achiever was awarded to Ankit Agarwal, from the 2008 Computer Engineering branch whose broad knowledge base and cross-industry experience has solidified into a winning growth and scaling methodology that has helped companies and startups evolve. The CRCE Corporate Leader was awarded to Susheel Pillai, from the 1990 Production Engineering branch who has 30 years' experience of Sales, Marketing, Business Development, of which more than 28 years have been in International Business. The CRCE Entrepreneurial Leader was awarded to Amar Pandit from the 1995 Electronics Engineering branch, who is the Founder of "Happyness Factory", the founder of Happydemic, CFA Charterholder from CFA Institute , Virginia, USA, the author of 4 bestselling books and has written more than 900 +columns for various renowned newspapers. The CRCE Social Impact Leader was awarded to Pavan Savant from the 1994 Production Engineering branch, who is associated with Management and Engineering for various institutes including Fr. CRCE as a Development Sector Consultant for NGO Capacity building. The CRCE Top Entertainer was awarded to Suchitra Pillai from the 1991 Electronics Engineering branch who is a renowned acting professional, VJ, RJ, Dubbing Artist, Singer, and compere.

Conclusion:

To summarize, the event provided an opportunity to all the alumni to reconnect with the institution and to spend some time reliving their graduation days. The Alumni Association hopes to develop an active community by reaching out to more alumni and having more engaging alumni meets in the future.

SUSHEEL PILLAI

Ex-CEO at ACG Worldwide

1. How did the first half of your career enable the second half of your career. What advice would you give to CRCEites in the first half of their career?

The first half of my career laid the foundation for the second half, in several ways. In the initial years, I explored a couple of areas of interest to identify potential career paths. So my advise would be to first determine what you are truly passionate about, what skill sets you possess and make informed decisions on your career trajectory. Then, invest in developing your skills, gain experience and establish a track record of success. Welcome change, never fear it, because invariably, change leads to opportunities for personal and professional growth.

ALUMNI INTERVIEWS

2. How did you manage to grow the ACG business across geographies and markets. What did you learn from this experience?

I was recruited to expand ACG's footprint across the globe. So initially I had to decide which regions/countries to target, depending on readiness of our products and services and also level of entry barriers. The next step was to tie up with local partners, who would help navigate the local business environment and access new customers. Essentially, fundamentals of Business and customers are very similar across the globe. In addition, one just needs to be mindful of local realities - including legal, regulatory, cultural. One has to keep customer delight at the core of all actions. They should experience you to be trustworthy - who would have their best interests also in mind.

3. What is the quality you feel is essential for any CXOs to posses to succeed in business?

A CXO must have several qualities, some of the critical ones, being - 1) Leadership Skills - Excellent communication and interpersonal skills are critical to be able to build trust and credibility with their team, stakeholders, and customers 2) Organisation Building - A CXO must ensure that the organisation thrives in perpetuity. This would mean having succession plans across levels, developing strong leadership pipeline and investing in people development. 3) Strategic Thinking - A CXO must have the ability to develop a road map for the organization that aligns with its vision, mission and values. 4) Innovation - A CXO must have the ability to think creatively and bring new ideas and solutions to the organization. 5) Resilience - A CXO must be able to maintain their composure in difficult situations, make decisions under pressure, and motivate their team to succeed in the face of adversity.

PAVAN SAVANT

Consultant - CSR & Capacity Building for NGOs 

1.. What made you venture into the field of social impact?

As a young professional, I always thought of giving back to society in one or the other form. In the latter half of my career, while working with Tata Communications (2006 onwards), I volunteered for NGOs and that is when I realised the importance of how small actions we do can benefit the underserved. I also completed the Post Graduate Program in Development Management from SP Jain which helped me meet many NGO executives and my visits to many NGOs across India gave me a better understanding of the ecosystem. It was then that I decided to quit the Corporate world & join NGO Muktangan in Mumbai as a Leader - Strategy. This is how my journey in the social space started and shaped up

ALUMNI INTERVIEWS

2. How has the corporate social responsibility landscape evolved over the last few years?

CSR was originally Charity given to NGOs without much of a purpose, just an output based action (except by few matured foundations). Now with the Government stepping in as well (statutory Corporate Social Responsibility (CSR) through the new Companies Act, 2013), corporate CSR programs are designed and evolve around Societal challenges. CSR has become a holistic concept with organizations now working on Strategic CSR with identified themes that go hand in hand with their business ethos.

3. What message would you like to pass on to the younger generation of CRCE?

Todays generation should focus on Excellence which means continuously striving to be better - Personally as well as professionally. They have to work on Self Growth, Communication Skills & Life Skills along with gaining more and more relevant Knowledge as the world is moving at a very fast & also dangerous pace.

4. Can you tell us a little about how you raise funds for various NGOs and how could CRCEites help in this aspect?

The way I raise funds for NGOs and needy individuals is through Crowdfunding. It involves building Trust & Transparency with my network (relatives, friends, current & ex colleagues and other people I know) and seeking support (nominal funds) from them for a social cause that I have done a thorough due diligence of. I call this "OurSocialGood" & in a few weeks our website will be going live, highlighting many of the programs & beneficiaries that we all supported. CRCE & passionate CRCEites can associate with our team and the causes that appeal to them and try to support in whatever way they can - Resources, Funds or Skills.

ALUMNI INTERVIEWS

AMAR PANDIT

Founder - HappinessFactory

1. How did you come up with the idea to create a company that is at the intersection of happiness and wealth?

I wanted to make a real and happy difference in the lives of people and decided to start my practice in India, where 99.99% of families had no written financial strategy and most had accumulated products and things they did not need. MFA was born from my "Yashodhan apartment bedroom" to build a fee-based wealth management firm in India with a simple strategy of taking care of clients with an amazing client experience and care.

ALUMNI INTERVIEWS

2. Is there a way to get Richie Rich, quickly? Or is wealth gained over a sustained period of time?

Real Wealth is built over time by starting early, saving well, spending well, investing in ownership, behaving well, and letting investments compound.

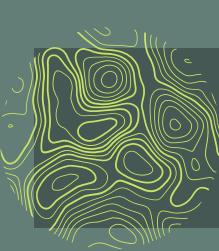

3. Why is the concept of goal based investment so important?

The most important idea is that to make smart decisions with money, it is important to have a goal or goals, use the planning process to address these goals, and then find products to populate that plan. This order of operations is essential for making smart decisions.

4. Finance and investments are something not taught in most schools or colleges. What is the one thing you wish that students would learn about finance early on in their career?

Compounding is an important concept that should be taught to students early on, as it is the secret of the richest investor in the world. 99.9% of Warren Buffett's net-worth was built after his age 60, and if he had retired at 60, his fortune would have been around \$11.9 million instead of \$84.5 billion..

ALUMNI SPOTLIGHT/STORIES

Prof. Saurabh Korgaonkar - ME Mechanical '13

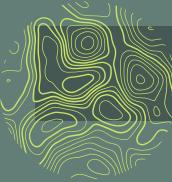

We are truly grateful for the education and opportunities provided by our college. It has not only equipped us with the skills necessary for success in our future careers, but has also instilled in us the values and knowledge needed to make a positive impact in the world. A special thank you to Professor D.S.S. Sudhakar, who has been an exceptional mentor and guide, helping us along every step of the way.

WE ARE PROUD TO BE PART OF SUCH A SUPPORTIVE AND EMPOWERING COMMUNITY AND LOOK FORWARD TO CONTINUING TO MAKE THE MOST OF ALL THAT OUR COLLEGE HAS TO OFFER.

Prof. Prachi Patil - BE Computer '06

Transitioning from a student to a professor in the same institute, I've been very lucky. The professors who have taught me have now become my colleagues and my family. From the process of "learning" to the stage of "teaching and learning", my ongoing journey in Fr. CRCE has been one of the best ones. I feel overwhelmed to call myself an Fr. CRCE'ite and look forward to see how my destiny unfolds in this institute!

CONCLUSION

The Alumni Association of Fr. CRCE feels proud in recognizing the achievements of our Alumni, Professors and our Students. We hope that this chain of success and pride may continue to reign on us forever.

This edition of our newsletter not only focused on the activities of our association but also brought back memories of professors who are alumnus of Fr. CRCE. A huge shoutout and thanks to the entire Alumni Association, The Student Alumni Committee, Professors and students without whom this would have not been possible. The past 39 years have been successful due to the support and contributions of people who have worked tirelessly in bringing pride and recognition to our institute.

With that being said, we conclude this edition and wish you the best of luck for your endeavours and hope that you stay connected with our "Roots" - CRCE!
